August 2026

Dear Hiring Manager,

I am writing to express my interest in a Full-Time Analyst in the Data & AI Program at JPMorganChase. With a strong foundation in computer science, practical experience shipping full-stack applications, and a genuine passion for building software that solves real problems, I am confident I would be a valuable addition to your engineering team.

Over the past few years I have designed and built several end-to-end projects that reflect both my technical range and my drive to go beyond coursework. One highlight is Journey, an AI-powered cross-platform fitness app built with Flutter and Dart, which integrates the OpenAI GPT API for real-time form correction and leverages Supabase for cloud data storage. Another is IntelliDoc, a full-stack document management system that uses BAAI/bge-m3 embeddings and pgvector to enable semantic, context-aware search over uploaded files. These projects gave me deep, hands-on experience across the stack, from architecting PostgreSQL schemas and building FastAPI and Flask backends, to crafting responsive React frontends and deploying on AWS S3.

I am comfortable working across a wide range of technologies including Python, JavaScript, Java, C++, and Dart, and I have practical experience with frameworks such as React, Node.js, Flask, and FastAPI. I take pride in writing clean, maintainable code and in thinking carefully about both the user experience and the underlying system design. I thrive in collaborative environments, pick up new tools quickly, and enjoy the challenge of translating complex requirements into working, reliable software.

I have completed my Bachelor of Arts in Computer Science at Hunter College and am eager to bring my skills into a professional setting where I can contribute meaningfully from day one while continuing to grow alongside an experienced team. I would welcome the opportunity to discuss how my background aligns with your needs.

Thank you for your time and consideration. I look forward to the possibility of speaking with you.

Sincerely,

Tawhidul Islam
